

Metal Roofing More Price-Competitive Than Ever

Excerpts from:

Oil Prices Affecting Asphalt Shingle Roofing Costs?

By [Tim McLoughlin](#)

“As oil prices hit a new high, increased costs are evident in every facet of our lives. For those homeowners with asphalt shingle roofs considering a roof repair, more cost increases may be on the way. As with any business, transportation costs have greatly increased, however, shingle roofing companies have a double burden to bear; the cost of one of their main supplies is quickly increasing. Since asphalt is created from crude oil, the cost of asphalt shingles is directly tied to that of oil. **As oil prices rise, so must the price of asphalt shingles.** Roofing companies both large and small are shaking from the painful blow dealt to them by the rising prices of gasoline, via oil. The trickle down costs of increased oil prices are a surprise to many homeowners.”
