

Can YOUR Roof Weather The Storm?

A properly installed metal roof from MPI probably will. In a recent high-wind storm in Tulsa, storage units with composition roofs were significantly damaged by tear-off and subsequent water damage. Those units with MPI metal roofs were virtually unharmed.

Great Finish, Tough Panels
Gotta Love 'Em.

The lower photos show composition roofs in the foreground, with the metal roofs on the back two buildings. Both roofs went through the same storm. Lower photos are unretouched.

Thanks to Alan Lewis, Lewis Roofing Systems, for this example.
