

NOW STOCKING IN TULSA!

22 ga. A606 Weathering Steel

A606 Weathering Steel is the latest trend in roofing products and architecture. Its unique look and naturally oxidizing finish provides a beautiful color and texture. It is the ultimate no care product because no one ever has to paint or scrape rust.

Weathering steels exhibit superior corrosion resistance over regular carbon steel as a result of the development of a protective oxide film on the metals surface which slows down further corrosion.

23.75" coil for:
