

Not All Paint Finishes Are The Same!

(All photos are building owner-supplied, and unretouched.)

Photos from an actual installation in Oklahoma, using panels from two different manufacturers. All panels were installed during construction. The visible panel fading and chalking occurred within **three years** of installation.

When we say the quality Sherwin-Williams finishes of MPI StrongSeam[®] panels will outlast the competition, the proof is in the pictures. MPI offers quality panels you will be proud of now, and years down the road.
