The HWR-16 Panel from Metal Panels Inc. delivers architectural impact with efficient wall coverage and a clean concealed-fastener design. With full 16" coverage and a narrow rib profile, HWR-16 proves ideal for commercial, industrial, or residential façades. Standard factory-formed continuous lengths can be run up to 46' to minimize seams, while 24- or 22-gauge steel ensures exceptional durability against weather and wear. Freely mix panels which interlock securely between HW-8, HW-12 and HWR-16, enabling cohesive multi-profile façades with limitless design flexibility. The HW-series panels allow horizontal or vertical installation over open framing or solid sheathing. The HWR-16 combines durable performance with crisp, classic visual appeal—engineered to elevate the entire building envelope.
